SARS-CoV-2 (COVID-19) RT-PCR

Tech:AMIT Date:11/23/21 12:19

Test	Result	Abnormal	Reference	Units	Previous Result	Date
SARS-CoV-2, RT-PCR	Negative		Negative			
<p>iAMP COVID-19 Detection assay from Atilla Biosystems using Powergene PCR is utilized in detection of nucleic acid from the SARS-Cov-2 in nasopharyngeal swab or oropharyngeal dry swab specimens collected from individuals suspected of COVID-19 by their healthcare provider. This test is a qualitative invitro diagnostic test that has been authorized by FDA under an EUA for use by authorized laboratories.</p> <p>-Negative results do not preclude infection with SARS-COV-2 virus and should not be the sole basis of a patient management decision.</p> <p>-Improper collection, transport, or storage of specimens may impact the ability of the assay to perform as indicated.</p> <p>-The impacts of vaccines, antiviral therapeutics, antibiotics, chemotherapeutic, or immunosuppressant drugs have not been evaluated.</p> <p>- The iAMP COVID-19 Detection cannot rule out respiratory diseases caused by other bacterial or viral pathogens.</p>
